EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Phillip Articola on 08/24/2004.

The application has been amended as follows:

- 1) Claim 25, line 15, change "an inspection object" to – inspection --.
- 2) Claim 25, line 17, change "an inspection object" to – the inspection --.
- 3) Claim 26, line 14, change "an inspection object" to – the inspection object --.
- 4) Claim 29, line 16, change "an inspection object" to – the inspection object --.
- 5) Claim 30, line 14, change "an inspection object" to – the inspection object --.

6) Replace claims 27,31 with the following:

27. (Currently Amended) A surface inspection apparatus according to claim 25, wherein the signal forming section for forming ~~data of scattered strength and detection size of~~ forms foreign matter ~~as a measuring data of foreign matters, which contained in a~~ on the basis of the light receiving signal of low sensitivity side scattered data ~~to have been regarded to have coincided with the coordinate of a saturated high sensitivity side scattered data are registered in data as the scattered strength and~~

Art Unit: 2877

detection size of the measuring signal in coordinate thereof, when the foreign matter signal detected by the light receiving signal that is higher in sensitivity out of the first light receiving signal and the second light receiving signal is saturated.

31. (Currently Amended) A surface inspection apparatus according to claim 30, wherein the signal forming means for ~~forming data of scattered strength and detection size of~~ forms foreign matter as the measuring signal of foreign matters, which ~~contained in a~~ on the basis of the light receiving signal of low sensitivity side scattered data to have been regarded to have coincided with coordinate of the saturated high sensitivity side scattered data are registered in data as a scattered strength and detection size of the measuring signal in coordinate thereof, when the foreign matter signal detected by the light receiving signal that is higher in sensitivity out of the first light receiving signal and the second light receiving signal is saturated.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Prior arts of record does not disclose a signal forming section for forming a measuring signal on the basis of the first light receiving signal and the second light receiving signal, wherein the first light receiving section and the second light receiving section respectively form the first light receiving signal and the second light receiving signal which are different in sensitivity or dynamic range from each other, wherein, in case that data of foreign matter of the first light receiving signal and data of foreign matter of the second light receiving signal exist in a predetermined range, the signal forming section forms data of foreign matter as same foreign matter on the basis of the first light receiving signal and the second light receiving signal as disclosed in claims 25,26,29,30.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
